## INTRODUCTORY LETTER.

---

October 31, 1913.

*His Excellency* HIRAM W. JOHNSON,

*Governor of the State of California, Sacramento, California.*

SIR:

I herewith submit the fourth annual report of the Superintendent of Banks of the State of California, pursuant to section 140 of the Bank Act enacted by the thirty-eighth session of the legislature and effective July 1, 1909.

The amendment of the Bank Act during the fiscal year 1912-13 was of dominating influence in the affairs of the State Banking Department. The changes thus effected reach the dignity of a revision of the banking laws of the State. The entire theory of state regulation of private capital as expressed in these laws before amendment, has been abandoned. Regulation with the least possible sacrifice of banking power has been substituted for inelastic, artificial legal machinery, unnecessary in any scheme of state control and embarrassing to any effort either to encourage or to govern the forces of profitable industry.

The Bank Act, before its amendment at the latest session of the legislature, worked needless hardship upon the business and banking community. Since its amendment the government of banking institutions is intended to run only to that extent which insures the conservation of the enormous amounts of private funds which banks control in their function of establishing a beneficial union between capital and credit.

Under authority of the amended laws, state supervised banks, which necessarily are the support of private credit and the basis of industrial progress, are given as wide a range of activity as is consistent with absolute safety of deposits. The amended laws are designed with the primary objective that the safety of bank deposits must not be imperiled. Stability of investments and the possession of cash resources sufficient for the emergencies of business have been the guiding posts, in the amended act, where regulation ends and freedom of honest action for the banker begins.

Before the act was amended it was a document retaliatory, occasional in its expression of fear of normal enterprise and glittering in penalties never designed to be enforced. The Superintendent of Banks as well as the bankers were bound by hard and fast rules of no practical value. Since its amendment wide discretion in the employment of alternative remedies has been given to the superintendent to the end that he may invoke ways and means best adapted to maintain the integrity of banking institutions.

In the consideration of the amendments to the Bank Act conference was had with the leading bankers of the State. The meetings were representative. Attention was given to the view point of different localities and the necessities of dissimilar conditions were weighed. My recommendations were concerned generally with a reform of the state law governing banks. It was sought to bring the administration of banks within the state system up to the highest expression of good law as evidenced in the statutes of other states and to regulate these institutions within the limitations of safety at the same time giving them liberty for the operation of sound commercial banking and safe savings banking and establishing new, if restricted, boundaries of supervision in the conduct of trust companies. Coincidentally it was determined to add to the law features which had proved admirable in other state jurisdictions, and also to provide penalties for offense against the law which would be effective.

As a result there is now embodied in the Bank Act of this State many important statutes among which prominently may be indicated the following: A restriction of the conduct of state banking in California to corporations eliminating the hazard and the very evident disadvantage of private banking as conducted by individuals and copartnerships; the regulation of the activities of foreign banking corporations in this State to a plane of equality with state banks, the foreign corporations having had exceptional special privileges not granted to state banks particularly in their capacity to loan far beyond the restrictions placed upon capital stock and surplus available in California; the creation of school savings banks, introducing an admirable feature enjoyed in other jurisdictions; making explicit the law which prohibited illegal banking and unwarranted advertisement of banking functions; a prohibition, effective in operation, against the solicitation of savings deposits by unauthorized agencies; a provision for the escheat of unclaimed deposits in all banks, an innovation in the state law which the banks necessarily have objected to for many years but one which is now in force in practically every other state jurisdiction as well as in this; placing a barrier against the evil of borrowing money by commercial banks and making the capital and surplus the limit for borrowed money, without permission, instead of an unrestricted liberty of borrowing in what amount they please; supervision by the State Banking Department of all securities offered for investment for savings banks; modifying the law governing trust companies, making it clear that private trusts are not under the supervision of the State Banking Department, segregating the so-called court trusts from private trusts, securing a greater measure of protection to court trusts and permitting a minimum capitalization of one hundred thousand dollars for trust

companies in Ohio having no more than a population of one hundred thousand persons, making feasible the reorganization of departments in some banks and removing the restriction of a fixed capital and surplus which prohibited a healthy growth through under conditions both restricting and annoying, providing for reasonable and effective penalties for violations of law both by banks and those who seek to impose the public on being banks, a greater liberality insured in the operation of commercial banks and in a minor degree of savings banks particularly in the direction of giving to directors, agents and employees larger opportunities to borrow the money of their institution either directly or indirectly, at the same time ample machinery being provided for the State Banking Department to possess full knowledge of these particular transactions and to exercise constructive authority against pernicious abuses, modifications permitting the superintendent to exert his influence for protection in the interest of calling stockholders of banks into action to prevent in these matters of necessary adjustment, provisions that stockholders of banking corporations may be assessed to the full amount of an impairment of capital stock; broader powers given to the Superintendent of Banks in the legislation of incorporated banks by which many of the inequalities, most of the delay and most of the annoyance to depositors are removed.

All of these amendments are positive additions to the banking law of this State. In addition to these the capital of savings banks heretofore fixed at a maximum of one million dollars has been permitted to establish a relationship between capital and surplus on the one hand and deposit liability on the other. A trust has been placed on the amount which may be loaned by a savings bank to any individual, partnership or corporation. All banks may utilize their surplus with which to pay losses under such conditions as safety demands. The superintendent has been granted the power to establish a system of amortization of bond holdings as the discretion may dictate. Reorganization banks need under the amended law pay for special services the penalty being represented in a per cent charge. The State Banking Department has been granted a larger fund that its activities may be greater and more effective represented as supervision.

The outcome of these organic changes in the law governing banks is necessarily yet to be determined in experience. Opportunity has been given for the development of new tendencies. A wider field has been opened for the transaction of commercial banking. Officers and directors of banks have been granted privileges of borrowing heretofore denied. That the result of this liberality, hedged by critical supervision, may be beneficial is naturally the desire of all who have an intimate concern for the well-being of the State.

I have at this time no suggestion of amendments to make.

During the fiscal year which ended June 30, 1913, the banks of the State, taken as a whole and representative of the manifold industries of California, enjoyed prosperity. Thirty-three new banking institutions opened for business and one bank in the state jurisdiction was forced to close its doors, to which fact reference was made in my third annual report. The coming of new banks was responsive to popular locality demands for banking facilities.

Of the new banks fourteen are exclusively commercial, eight are confined to savings and eleven are conducting a departmental, savings and commercial business. As a further indication of spreading activities twenty-six branch offices of banks were opened and nine savings departments and one commercial department were added. Three banks voluntarily retired from the field and two of them are paying the last remaining few of their depositors. In the various changes which a year evolves four banks in the state system nationalized and ten sold their assets, in this fashion concentrating and centralizing banking functions.

Statistically it is a matter of interest that at the close of business on June 30, 1913, there were 468 state banks with 80 branch offices. Of these 146 were commercial banks, 136 were savings banks, 6 were trust companies, 166 were commercial and savings banks, 11 were commercial, savings and trust companies, 2 were savings and trust companies and 1 was a commercial and trust company.

Substantial increases in assets, deposits, capital paid in, cash in banks, surplus and in loans and discounts and a marked decrease in money borrowed by state banks reflect significantly conditions of health and prosperity in the state system. These facts with the exception of borrowed money are tabulated as follows:

	1911-1912	1912-1913	Increase.
Assets -----	\$666,998,510 30	\$705,817,341 80	\$38,872,831 50
Loans and discounts--	416,634,278 72	458,397,609 31	41,763,330 59
Cash in banks-----	24,199,035 45	26,934,808 68	2,735,773 23
Capital -----	60,675,195 33	62,668,893 96	1,993,698 63
Surplus -----	26,315,612 49	27,785,528 11	1,469,915 62
Undivided profits----	14,758,701 59	15,271,219 99	512,518 40
Individual deposits--	532,951,777 00	561,921,694 36	28,969,917 36

The total of \$561,921,694.36 of deposits is divided as follows: Commercial deposits \$130,690,263.29, an increase of \$1,574,308.56 during the year; savings deposits \$430,504,798.85, an increase of \$29,739,561.57. The total of savings depositors in the State was 841,780; commercial depositors 313,582. At the close of the fiscal year June 30, 1912, the banks of this State had an aggregate of \$2,370,989.73 borrowed money; at the close of the fiscal year June 30, 1913, the aggregate was \$1,560,227.92, showing a decrease of \$810,741.81.

All of the banks in the state system received a call for report of condition as of the close of business of the following days: August 14, 1912; January 31, 1913; June 4, 1913.

A statement of condition of all state banks as shown by the call report of June 4, 1913, as compared with the report of condition as of June 14, 1912, with other schedules and statements are appended hereto as part of this report. These include the following:

1. Summary of condition of every state bank.
2. List of new banks and branch offices.
3. Names and compensation of all persons employed by the Superintendent of Banks and the whole amount of receipts and expenses of the department during the year.
4. Names of banks placed in the hands of the Superintendent of Banks in process of liquidation and the amount of dividends paid thereon.
5. Miscellaneous changes in banks.
6. Report of unclaimed deposits.
7. Tabulated statement of condition of banks.

Yours very truly,

W. R. WILLIAMS,  
Superintendent of Banks.

FIFTH ANNUAL REPORT

OF THE

SUPERINTENDENT OF BANKS

OF THE

STATE OF CALIFORNIA

1914

---

Showing the Financial Condition of State Banks at the Close of  
Business June 30, 1914

CALIFORNIA  
STATE PRINTING OFFICE  
1914

## INTRODUCTORY LETTER.

October 31, 1914.

*His Excellency* HIRAM W. JOHNSON,  
*Governor of the State of California,*  
*Sacramento, California.*

DEAR SIR: I herewith submit the fifth annual report of the superintendent of banks of the State of California, pursuant to section 140 of the Bank Act, enacted by the twenty-eighth session of the legislature and effective July 1, 1909.

During the fiscal year which ended June 30, 1914, those banks of California that are under the jurisdiction of the state banking department enjoyed prosperity. Their resources showed a splendid increase over the great aggregate of the year before. Their banking power was broadened to meet an expanding field of industry and was reflected in a magnificent total of loans and discounts.

The state banks of California are entitled to the fullest confidence of the people of the state. They are well managed by conscientious and capable officers and directors. An increasing volume of business in the state, demanding enormous credit facilities, has been well met by our state banks during the fiscal year. Deposits have increased, resources are greater and credit conditions demonstrate a growth of business that is healthful. As reflected in their banks the people of California are prosperous in all departments of productive energy.

It should be a matter of congratulation that all of the state banks of California have been successful during the fiscal year when there was an unquestioned depression in business and a financial strain since imposed primarily by the European war. It is gratifying, however, to report that the state banks of California, unlike similar institutions in some other states, have felt unsettled conditions only in a very small way. The state banks of California have practically escaped the consequences of the financial unrest which has spread so widely over the world. Our banks have endured less of commercial stagnation than have others and the prosperity of the state has not even been held stationary, much less retarded. Capital is active, industry is widespread and enterprise is successful. This is the significant story told in the condition of state banks for the fiscal year now under discussion.

As related in the called report of June 30, 1914, the condition of the state banks of California is one of the most satisfactory in the United States. This condition is representative of a prosperity far in excess of what might be expected from the population of the state. The combined assets of the state banks of California on that date were \$745,221,700.08, an increase in assets over the previous year of an aggregate

of \$39,404,358.28. This advance of assets, as representative only of one of the elements of the banking power of the state, proves the marked prosperity which California has enjoyed under world conditions which have been recognized as not the best. Upon the same date the banks of this state had in loans and discounts an aggregate of \$465,417,351.17, an increase of \$7,019,741.86. There was at the same time cash on hand in banks of the state a total sum of \$30,548,948.12, an increase over the aggregate of the preceding year of \$3,614,139.44. On the last day of the fiscal year of 1913-1914 there were in the state banks of California \$575,557,512.10 in individual deposits. This aggregate represents an increase over the previous year of \$13,635,817.74.

This total of deposits represents a steady, healthful and substantial growth. It is significant that in the last three years and a half, from January, 1911, to June 30, 1914, the deposits, individually considered and representative of the banking wealth of the people of California, increased in the state banks alone more than \$108,000,000.

Of the aggregate of \$575,557,512.10 there were \$449,221,639.57 in saving deposits of individuals alone. This remarkable total of savings deposits, representative of the prosperity, frugality, thrift and progress of the people of California, brings this state up in these deposits to fourth in the entire United States.

At the close of the fiscal year 1913-1914 the aggregate capital invested in the state banks of California was \$62,173,816.66, which was \$495,077.30 less than the preceding year. This decrease, however, represents no untoward circumstance, as primarily it was caused by the retirement as a banking institution of a corporation with a capital of \$1,100,000 and a surplus of \$110,000 and which was engaged only in the trust banking business. On the other hand, there was an increase of \$703,535.71 in the surplus of state banks. On June 30, 1914, the state banks of California had accumulated a surplus, in addition to their capital, of \$28,489,063.82 showing to what very great extent the bankers of California are seeking to strengthen their institutions and to increase the confidence in which they are held by the public.

The condition of the banks of California proves that the working capital of the state is employed to its highest advantage. There is a healthy development of the resources of the state. The people are prosperous and domestic conditions are established on so firm a basis that external conditions have operated only in a minimum degree.

Since my last report ample time has been given to judge in experience of the effect of the many important amendments to the Bank Act made by the legislature at its session in 1913. These amendments in their aggregate accomplished a practical revision of the banking laws of this

state, making them more effective in operation, more definite in application and more thoroughly representative of desired conditions than the Bank Act of 1909 and the amendments of 1911. It is a matter of gratification to bankers and to those who deal with the banking community that in the amended act of 1913 greater liberality in the conduct of banking assets and greater elasticity in the handling of loans and discounts were given.

This, particularly in the field of commercial banking in this state, has worked to the advantage of the community at large. Opportunity has been given for the development of legitimate enterprise and localities throughout the state have benefited from the more liberal treatment of banking facilities. At the same time greater discretion and more significant latitude have been given to the operations of the supervisory authority that there might not creep into the remodeled system of state banking abuses which work to the injury either of the banks or of the communities in which they are organized. I am pleased to report that there is now a very general observance of the law in this state. A violation of our statutes is now an exception, readily brought within the observation of the state banking department and easily adjusted. The bankers as a whole recognize the necessities of supervision and meet these requirements in good spirit. While greater liberties have been given to the commercial banks in the organization of the credit of the communities, at the same time these broadened powers must be and are exercised strictly within the limits of safety.

Among the most important of the changes made practicable by the amendments of 1913 was that providing for an examination by this department of the bonds submitted by corporations for investments by the state banks. We have created within the department a bond department which gives critical consideration to every bond issue submitted for public patronage. The activities of the state banking department in this reference have been of material advantage, not only to the banks but to the conservative investing public. We are enabled now to fortify all of the banks under the state jurisdiction as against unwise or hazardous investments in bonds. All public utility corporations must pass their bonds in critical review before this department.

As an incident in this new administration corporations have indicated very generally the desirability of securing the approval of the state banking department for their credit instruments. Banks have now the means of ascertaining absolutely the character of bonds which are offered for purchase and it is now quite beyond the range of probability that investments by banks in this kind of securities will be ill advised.

An interesting extension of this public service has manifested itself in the desire of real estate corporations to have the state banking depart-

ment pass judgment upon their bond issues. This indication, which is distinctly one of good faith, is of common benefit to the corporation seeking credit and to the public which desires to invest its money in such securities. We anticipate a rapidly broadening influence of the state banking department in this particular field.

I desire also to report the establishment of a credit department, the purpose of which is to have at our command the standing of borrowers in all of the banks of the state. We are enabled, through the institution of this department, which rapidly is being brought to a state of high efficiency, to give valuable advice to banks in their credit department and at the same time be able to have broader vision and closer knowledge of the credit of large borrowers than any single institution or any group of banks.

Among the important amendments to the Bank Act adopted at the session of the legislature in 1913, was one which provides that all amounts of money heretofore or hereafter deposited with any banks to the credit of depositors who have not made a deposit on said account, or withdrawn any part thereof, or the interest, or which shall have remained unclaimed, for more than twenty years after the date of such deposit or withdrawal of any part of principal or interest, and for which no claimant is known or the depositor can not be found, shall, with the increase and proceeds thereof, be deposited with the state treasurer in the same manner and subject to the same distribution as provided for the estates of deceased persons in section 1234 of the Code of Civil Procedure. To this amendment there has been interposed by the banks a legal objection.

This protest in no way reflects the desire on the part of the banks to evade the intention of the act, but they wish simply to determine their responsibility beyond any question. They have therefore, upon an agreed statement of facts, submitted the question for court decision. In the event that an opinion shall be rendered adverse to the statute I recommend that an amendment be presented to the legislature at its next session. As a matter of public policy most of the states of the United States make provision that deposits conditioned similarly to those described in our statute shall be placed in the custody of the state and revert finally to the school fund. The objection which we here indicate as having been made is one purely of administration and not of policy.

I desire also to report that one of the amendments to the Bank Act adopted in 1913, that which particularly enlarges the capacity of banks to engage in so-called school savings banking, has met with a very generous response, and there are now several of our largest and most thickly settled communities enjoying the advantages of this new system. Expe-

rience indicates that the establishment of these so-called school banks as branch offices of regularly organized institutions will inspire a spirit of thrift in school children.

The amendment to the Bank Act which enables the state banking department to give to recalcitrant or feeble institutions such special care and attention as may be necessary for their protection or improvement has worked to excellent advantage. We are enabled now without working an injustice to progressive and self sustaining banks to assist other institutions.

I am convinced that an amendment may be made to the trust sections of the Bank Act so that abstract companies may be permitted to act in the capacity of trustees in securing legal title to realty as one of the incidents of transactions whose ultimate object is the transfer of property through a corporate intermediary. The law governing trust companies in this state gives exclusive capacity to act as trustee for any purpose permitted by law only to those corporations which are organized within the limitations of the Bank Act, or under the provisions of section 453*r* of the Civil Code. In this manner abstract companies, which find their field of operation in practically all of the county seats of the state, are barred from an incident in their legitimate conduct of affairs. There would appear to be no hazard and apparently no objection to abstract companies being permitted to act in conjunction with their ordinary affairs as escrow men or trustees in holding for a time the legal title to property. I suggest therefore that such an amendment to the law be made.

It is a matter of satisfaction to the state banking department that the changes made by the amendments to the Bank Act in 1913 affecting trust companies have worked well to the advantage of the state. Trust companies may be formed now in smaller communities with a minimum capitalization of one hundred thousand dollars. Advantage of this provision has been taken and there has been broadened very materially the field of trust companies in this state. The new law has added also to the dignity which necessarily should surround the operations of trust companies and a very commendable spirit has been displayed by the public at large in urging that unauthorized companies, copartnerships and individuals be prohibited from an unwarranted and illegal exercise of trust functions.

I earnestly recommend also that an amendment to the Bank Act be adopted so as clearly to establish the authority of state law over those state banks which may become members of the federal reserve bank. It will be remembered that at the session of the state legislature in 1913, and before the adoption of the Federal Reserve Act, it was deemed

advisable that an amendment to the Bank Act of California be adopted so as to give privilege to the banks of this state to become members of the prospective federal reserve bank. This amendment was adopted in anticipation of the creation of the federal reserve association and also as a precautionary measure to permit banks of California to avail themselves of every advantage contemplated in the enactment of the federal law.

It has been found, however, that far too broad a license may be construed into section 56 of the Bank Act which permits state banks to join the federal reserve banks. I believe it imperative, therefore, that an amendment which will prevent the lessening of the strength or an encroachment upon the stability of state banks in this relationship must be adopted. There should be in section 56 of the Bank Act of California a reservation that all banks which become members of the federal reserve association and units in the regional reserve district of which this state is a part shall remain in all respects subject to the laws of this state and to the supervision of the superintendent of banks.

In the same connection we have had under discussion with the federal reserve board the character of membership which banks under state jurisdiction in California may enjoy as members of the federal reserve association. This state is practically the only one in the United States which has found it wise to departmentize to the final expression of safety by complete segregation of each department. There has arisen in consequence some doubt as to the conditions under which a state bank may become a member of a federal reserve bank. I have submitted to the federal reserve board the point of view of this department, particularly in that reference which indicates our desire to preserve in its complete integrity the departmental feature of our Bank Act. It is quite a matter of serious concern to this state that the line of demarcation between the savings department and the commercial department and the trust department shall be maintained to the last analysis in every banking institution.

We have also under consideration with the federal reserve association our point of view, which we have found it necessary to present insistently, that savings depositors in this state be protected against the hazards of commercial banking. Under the Bank Act of California the greatest care has been taken to protect the public against any investment of savings in the assets of commercial banking. Our savings banks are hedged about by a restricted field of investments and loans. In opposition and contrast to this protective policy of California, some national banks resident in this state are seeking to create the impression that they have not only equal authority to solicit savings deposits but

that to these deposits is given a security at least equal to that insisted upon by state law.

This is not a condition which suggests itself to this department as working to the best advantage of those who desire to place in banks their savings. We have asked the federal reserve board, therefore, to indicate to us whether or not the word "savings" and the conduct of all banking business which is in the manner of a savings bank business shall be protected as against such invasion by national banks located in California. To these inquiries we have yet to receive a reply. Until we are given an answer to both of these important questions it will be impossible to suggest a prospective amendment to our law which will protect the state against what seems to be a loosening of the restrictive legislation which has been woven around the savings of the people of this state.

I desire also to suggest an amendment to the Bank Act which will equalize the reserve requirements of state banks with that of national banks and members of the regional federal reserve banks. It has been found expedient by the national government to reduce the reserve requirements primarily because of the centralized reserves which are now provided for in regional reserve banks. If we insist upon the present state law requirement, state commercial banks will unnecessarily be placed at a disadvantage. I believe that we may fully, within the limitations of complete safety, reduce the reserve requirements to an equality with those of the other banks involved.

I desire respectfully to suggest the propriety of an amendment to our law by which the organization of banking corporations in this state will be placed completely within the purview and at the discretion of the state banking department. It is now the law that groups of men may organize banking corporations without authority from this department. The general statutes incorporated in the Civil Code govern the incorporation of all corporations. It would be eminently advisable that banking corporations should be withdrawn from such a privilege, and that every step in the organization, from an expression of a desire to organize until the granting of a certificate of final authority to conduct a banking business, should be absolutely under the direction of the state banking department.

As the law now stands in this state there is a divided authority as between the secretary of state and the state banking department in the organization of banking corporations. Although the final governmental act, which gives to a banking corporation its right to conduct a banking business, is the act of the superintendent of banks there is

in this governmental scheme a confusion of ideas unnecessarily burdensome upon incorporators and upon the departments of government involved.

I urgently suggest therefore that an amendment to the law be made taking the organization of all banking corporations from the secretary of state and making it resident in the superintendent of banks. Such an amendment will be in harmony with the latest expression of state legislatures in this reference. It will bring our banks also in agreement as far as their organization is concerned with the national system. As we are now conditioned, the public convenience and advantage must be considered in the licensing of a banking corporation, but at the same time we permit a corporation to be formed before the question of the public convenience or advantage may even be discussed. Obviously this is not to the best advantage either of organizers or of the departments of government interested.

It is my purpose to suggest certain other amendments to the Bank Act of this state. These amendments will relate purely to adjustments which experience has demonstrated as necessary and are concerned only with minor matters. We have found perhaps here and there an inadequacy or clumsiness of expression or a minor conflict as between sections, the result of the enormous task of practical revision which was accomplished in 1913. I wish particularly to bring every section of the act, which may have a bearing upon any other, into complete harmony of expression as well as of purpose and intention. With that in view I shall ask certain other amendments to the Bank Act.

I beg also to report that rapid and satisfactory progress has been made in the liquidation of banks which have been sequestered and which are now passing through the various stages of dissolution. The success which has attended the efforts of this department in this regard argues well for the liquidation of sequestered banks by the state banking department.

I have to report also that Citizens Bank of Visalia was closed by me because of unsatisfactory management resulting in an unnecessary hazard to the institution. As soon as manifest provisions of law were obeyed, a new management installed and new capital invested in the institution, I permitted its reopening upon a complete basis of solvency. I have also to report that the liquidation of the Bank of Modoc County has been concluded. The condition of other banks in liquidation at the close of the fiscal year under discussion will be shown more completely in detail in the report which follows.

During the fiscal year 1913-1914, 19 new banks were organized and began business under authority of state law. Of the banks thus newly established 5 are devoted exclusively to a commercial banking business,

2 are savings banks, 2 are trust companies and 10 are departmentized with the privilege of conducting a commercial and savings bank business. At the close of business on June 30, 1914, there were under the jurisdiction of this department 473 state banks, with 77 branch offices. Of these 138 are commercial banks, 137 are savings banks, 7 are trust companies, 175 are commercial and savings departmental banks, 14 are commercial, savings and trust companies, 1 is a savings and trust company and 1 is a commercial and trust company.

During the fiscal year under discussion 6 banks were authorized to establish new branch offices. Six institutions availed themselves of the new law which permits so-called school savings banks to accept the responsibility of the collection of school savings. In the institutions already established in the state 2 introduced commercial departments, 9 broadened their sphere of activity to include savings departments and 2 others took advantage of the new law to establish trust departments in their institutions.

During the year 3 banks, their sphere of activity and influence no longer being profitable, voluntarily retired as banking institutions. Six state institutions voluntarily closed their branch offices. This tendency, however, was one looking to the greater stability of the home office and the needlessness of maintaining banking facilities in districts well equipped. Ten banks changed their names during the year. Four institutions passed into the national system. This very small percentage of banks removing themselves from the influence of state laws and accepting the government of national authority is of particular significance in view of the creation of the Federal Reserve Act. Nine banks found it to their advantage to sell their assets to others, thus strengthening the banking situation in which the transactions took place. In 12 banks of the state the capital stock was increased and in 6 it was reduced. The reduction, however, was not an untoward indication, as in all instances it was found that the banks had been capitalized in excess of the necessities of their communities. Two banks became extinct by consolidation, thus introducing into the state system a new and stronger bank than either of those which disappeared.

All of the banks in the state system rendered a called report of condition as of the close of business on the following days: December 24, 1913; March 11, 1914; June 30, 1914.

As already indicated these reports disclosed most substantial increases in assets, deposits, cash on hand, surplus and loans and discounts as compared with the previous year. The aggregate is best expressed in a tabulated form, the comparison being made as between the called

report of June 30, 1914, and the called report of June 4, 1913, as follows:

	1912-1913	1913-1914	Increase	Decrease
Assets -----	\$765,817,341 86	\$745,221,700 08	\$39,404,358 28	-----
Loans and discounts-----	458,397,609 31	465,417,351 17	7,019,741 86	-----
Cash on hand-----	26,934,808 66	30,548,948 12	3,614,139 44	-----
Capital -----	62,668,893 96	62,173,816 66	-----	\$495,077 30
Surplus -----	27,785,528 11	28,489,063 82	703,535 71	-----
Undivided profits -----	15,271,219 99	10,524,715 30	-----	4,746,504 69
Individual deposits -----	561,921,694 36	575,557,512 10	13,635,817 74	-----

Appended hereto and made a part of this report are the following:

1. Summary of condition of every state bank.
2. List of new banks and branch offices.
3. Names and compensations of all persons employed by the superintendent of banks and the whole amount of receipts and expenses of the department during the fiscal year.
4. Names of banks placed in the hands of the superintendent of banks in process of liquidation and the amount of dividends paid thereon.
5. Miscellaneous changes in banks.
6. Reports of deposits unclaimed for more than twenty years.
7. Tabulated statement of condition of banks.

Yours very truly,

W. R. WILLIAMS,  
Superintendent of Banks.

Legal expenses .....	532 15	
Special Deputy Superintendent's salary .....	270 00	
All other expenses .....	502 44	
		6,172 86

Balance .....

All assets, excepting cash on hand, were sold to B. Lauer, *et al.*, on October 15, 1912, pursuant to an order of the Superior Court of Modoc County, California, made October 7, 1912, for the sum of \$86,804.27.

The conditions under which the assets were sold are as follows: The purchaser gave a bond in the sum of \$86,804.27, undertaking to pay said purchase price from time to time upon demand whenever it might be necessary for the payment of any lawful claim against the bank and for the necessary and legal expenses of liquidation.

No claims of depositors against the bank were filed and all known creditors have been paid by the purchaser of the assets and their claims were assigned to the Superintendent of Banks.

The liquidation of the Bank of Modoc County having been completed, on July 8, 1914, the final report and account was approved by the Superior Court of Modoc County, California, and the principals and surety on the bond released, and on July 29, 1914, the books and papers which had been taken possession of were returned to the stockholders of the bank.
